About

I am an accomplished web developer with a proven track record in designing, developing, and maintaining web applications using contemporary programming languages. With two years of experience, I have proficiently worked on both the front-end and back-end facets of web applications. My primary expertise lies in crafting responsive and reusable web UI components, complemented by a solid ability to contribute to server-side coding.

Skills and Interest

- Symfony, Laravel, Next.js, BoltCMS, WordPress
- JavaScript, TypeScript, jQuery, React.js
- HTML, CSS, Bootstrap, Tailwind CSS, SASS/SCSS
- Postman, Docker, GIT, Microservices, Vercel, Railway
- Amazon Web Services (Elastic Container, S3, EC2, RDS)
- Search Engine Optimization (SEO), Page Speed Improvement

Professional Experience

Lamudi Technical Services Corp. | Junior Software Engineer

2022 – 2024

Key responsibilities:

- Implement Search Engine Optimization (SEO) techniques to improve website visibility.
- Optimize page speed for better user experience and increased traffic.
- Develop reusable web UI components with React.js and JavaScript tests while adhering to team coding standards.
- Lead the refactoring of custom CTA Google Analytics events to track website activities, such as clicks, page loads, and form submissions.
- Maintain version control by upgrading Symfony from version 4 to 5, along with plugins and Node.js modules.
- Address and resolve bugs during the production release phase.
- Create technical and analytical documentation for reported bugs or issues.
- Revamp, enhance plugins, and maintain a clean codebase for the company's external client website using Bolt CMS or WordPress.
- Automate the deployment of Bolt CMS repositories using a CI/CD Bitbucket pipeline.

College of Information Technology | Intern Faculty Office

Central Bicol State University of Agriculture–Sipocot

2020 – 2021

Key responsibilities:

- Initiated and guided the development of the COVID –19 Contact Tracing System for LGU Libmanan.
- Handel the deployment of contact tracing system to college.
- Train on Amazon Web Services.
