JAY MARK BORJA

Full-Stack Web Developer | Frontend Developer | Backend Developer

+(63)962-263-3264 | dev.jymarkb@gmail.com | linkedin.com/in/jaymark-borja

resume.jymarkb.info | github.com/jymarkb

Pasong Putik Proper Quezon City, Metro Manila, 1118

Skills

- **Frontend**: React.js, TypeScript, Tailwind CSS, HTML, CSS, SASS, Bootstrap, shadcn/UI, TinyMCE, jQuery, Material UI
- **Backend & Databases**: Symfony, Laravel, Next.js, Bolt CMS, PHP, Prisma.io, MySQL, Supabase, PostgreSQL
- **CMS & DevOps**: WordPress, NGINX, Docker, AWS Services, Railway, Vercel, Namecheap
- **AI, API & Tools**: OpenAI, Gemini, Stripe, Auth0, GoHighLevel, Twilio, DocuSign, reCAPTCHA, BatchData, Git, ESLint, Postman, Figma, WSL2 Linux,

Experience

SEO For Real Estate Investors LLC **– PHP Developer** July 2025 – Current

#401, 35 E Main St. Avon CT 06001 – Remote (US)

- Led the development of the internal lead messaging system within the REILink platform, implementing deal pipeline functionality to support property-based lead generation, enhancing lead tracking and deal visibility.
- Enhanced platform features including online community, classroom modules, onboarding workflows, and AI-powered real estate tools, increasing user interaction and feature adoption.
- Integrated third-party property data sources (Zillow, Redfin, Trulia, BatchData) to improve contract property listing ingestion and data accuracy, reducing manual data entry and improving data consistency.
- Implemented secure authentication using Auth0 and reCAPTCHA across multiple platforms (Apex, REILink), enabling centralized user access and strengthening platform security and access control.
- Automated lead generation and pipeline workflows through Go High Level integration, improving client acquisition and follow-up efficiency by reducing manual effort.
- Built and maintained APEX Webhosting features, including Stripe payment integration (subscriptions and one-time credit systems).
- Developed custom WordPress plugins and Gutenberg-based lead capture systems using hooks and REST APIs, implementing endpoint-driven lead processing, with Twilio integration for configurable messaging workflows and DocuSign integration for automated contract signing upon lead qualification.
- Optimized and enhanced the Apex Editor to support seamless rendering of WordPress Gutenberg blocks, while resolving critical bugs and block validation issues, improving editor performance.
- Designed and engineered an automated WordPress page generation system based on target city selection, leveraging queue-based workers, Gemini for content generation, and OpenAI for image generation, with webhook-driven delivery, automating large-scale page generation and reducing manual workload.
- Designed and optimized CI/CD pipelines with staging and testing environments (Namecheap), managed production deployments, and containerized local development using Docker, ensuring reliable deployments and reducing release errors.
- Improved application performance by ~40% through query optimization, page load enhancements, and UI/UX bug fixes.

Lamudi Technical Services Corp**. - Junior Software Engineer** May 2022 – March 2024

Makati City, Metro Manila

- Transformed Figma mockups into reusable, responsive UI components, ensuring consistency with team coding standards and improving frontend development efficiency across multiple projects.
- Contributed to upgrading the core backend framework from Symfony 4 to Symfony 5, ensuring PHP 8 compatibility and aligning the system with AWS deployment standards to support modern cloud infrastructure.
- Maintained and enhanced a landmark search microservice, optimizing Elasticsearch indexing logic to deliver accurate geographic results based on dynamic user filters, reducing search latency.
- Implemented conditional logic to call the landmark API only upon user map interaction, reducing unnecessary backend load and cutting server query cost by 35%.
- Led the refactoring of Google Analytics custom event tracking, standardizing CTA metrics for clicks, page views, and form submissions; resulting in more reliable conversion insights.
- Optimized multiple key pages across the website for SEO by implementing meta tag best practices, structured data, and performance techniques; resulting in a PageSpeed Insights score increase from 70 to 90+ and improved visibility on both mobile and desktop searches.
- Automated the deployment process using Bitbucket CI/CD pipelines, streamlining code delivery and reducing manual deployment time.
- Documented technical issues and resolutions, producing clear analytical reports for recurring bugs, which improved team troubleshooting and knowledge sharing.

College of Information Technology **– Intern** November 2020 – March 2021

Central Bicol State University of Agriculture - Sipocot

- Designed and developed a COVID-19 Contact Tracing System for the LGU of Libmanan, enabling resident registration, QR ID generation, and scan history reporting via a web application.
- Integrated a geographic interface on the website to visually track COVID-19 cases by barangay for improved data-driven decision-making.
- Built a mobile scanner app for establishments to scan residents' QR codes, streamlining contact tracing at entry points.
- Assisted in the school's accreditation process by organizing and clustering departmental documents and contributing to the revision of the curriculum for the upcoming academic year.
- Led the maintenance and technical support of the department's computer laboratory, ensuring all workstations remained operational.

College of Information Criminology – **Intern** November 2019 – March 2020

Central Bicol State University of Agriculture - Sipocot

- Designed and developed a web-based capstone project repository system (E-Caprolib), enabling students and faculty to submit, browse, and manage academic research projects efficiently.
- Maintained and provided technical support for office computers, ensuring smooth daily operations within the department.

Education

Bachelor of Science in Information Technology August 2020 – March 2021

Central Bicol State University of Agriculture - Sipocot

- **Awards:** Best Capstone Project, Best Capstone Administrator, Outstanding in On-The-Job Training

Projects

Apex

- Designed and built a full-stack web platform for automated WordPress site and page generation, supporting scalable real estate content creation with AI-generated content and images, payment processing, and workflow automation; part of a broader system that includes CRM and lead management features; *PHP, Symfony 7, React, Tailwind CSS, MySQL, Docker, AWS, REST APIs, Webhooks, Queue Workers, Stripe, Twilio, DocuSign, OpenAI, Gemini*

REILink

- Designed and built a full-stack real estate platform for lead generation, deal pipeline management, and investor collaboration, featuring internal messaging, community and classroom modules, AI-assisted property analysis tools, and third-party property data integrations; live at reilink.com; *PHP, LAMP Stack, Symfony 7, Preact.js, JavaScript, Webpack, Tailwind CSS, MySQL, Docker, Apache, REST APIs, Auth0, reCAPTCHA, Go High Level, Third-party APIs (Zillow, Redfin, Trulia, BatchData), CI/CD Pipelines, Linux Environment, Namecheap*

Blog Content Management System

- A full-stack content management system for creating and managing blog posts, featuring user authentication, role-based access, WYSIWYG editing, image uploads, and responsive design; live at myblog.jymarkb.info; *Symfony 7, React 18 with TypeScript, Tailwind CSS, MySQL, Docker, Nginx, Railway*

COVID-19 Contact Tracing System

- A system developed for the Local Government Unit of Libmanan to manage COVID-19 contact tracing. The web application allows residents to register and generate QR identification codes, while the mobile application enables establishments to scan QR codes and track exposure history; *PHP Laravel, Bootstrap, MySQL for the web; Java, Material UI, SQLite for the Android app*

ECAPROLIB – E-Capstone Project Library

- A digital repository platform designed to store, organize, and provide access to student capstone projects within the university. It enables project submission, browsing, and archiving for academic reference; *PHP, Bootstrap, MySQL*
